

ARGELIUS LABS

Boutique OSINT Consulting & Persistent Monitoring

We Find What Others Miss—Before It Matters

Argelius Labs is a boutique open-source intelligence (OSINT) consulting and continuous monitoring firm serving both businesses and high-net-worth individuals. We help proactively identify and mitigate digital risks across your enterprise or personal online presence before they cause harm. Led by industry experts with decades of investigative experience, Argelius Labs provides expert-level security insight without the big-firm fluff, delivering a clean, high-tech solution tailored to your needs.

Services Offered

External Attack Surface Assessments:

Holistic evaluation of your organization's internet-facing assets to uncover hidden vulnerabilities and exposures (a risk evaluation, not a penetration test). We provide a detailed risk profile of your external attack surface and actionable recommendations to strengthen it.

Ongoing Digital & OSINT Monitoring:

Continuous surveillance of open sources and digital channels for early threat detection. We monitor data breaches, social media, news, and other online indicators to alert you to emerging risks in real-time so you're never caught off-guard.

Deep & Dark Web Threat Intelligence:

Early warning of threats from the underground. Our team monitors deep web and dark web forums, marketplaces, and illicit communities for your sensitive data or brand mentions. If your information is being circulated or targeted in hidden corners of the internet, we'll find out and notify you immediately.

Reputation & Brand Protection

Active defense of your personal or company reputation online. We track social media, websites, and news for impersonations, defamation, or unauthorized use of your brand. When a risk to your reputation is detected, we help you counter it swiftly to protect your good name.

Key Value Propositions

• Expert-Led Security:

Benefit from leadership with top-tier credentials. Argelius Labs is led by a Senior SANS OSINT instructor and author with over 20 years of experience in federal law enforcement and cyber investigations. This means every assessment and monitoring effort leverages decades of expertise for thorough, reliable results.

• Boutique & Cost-Effective:

Get expert-level security at a competitive price. As a boutique firm, we offer high-quality, customized services without the heavy overhead or bureaucracy of larger companies. You receive direct, focused attention from senior experts—ensuring more value and no wasted resources on your engagement.

• Proactive & Personalized:

We believe in proactive rather than reactive security. Our team continuously hunts for threats and indicators across your digital footprint, addressing issues before they escalate. Services are tailored to each client's unique needs—you get a personalized security solution with no one-size-fits-all approach. In short, we find what others miss, and we find it early.

Get Started

Schedule a Consultation Today – Plan your assessment. Contact us to discuss an External Attack Surface Assessment or bespoke OSINT review. We'll evaluate your current exposure and outline how to fortify your digital presence.

Sign Up for Continuous Monitoring – Invest in ongoing protection. Enroll in our persistent monitoring program for round-the-clock threat intelligence and peace of mind. We'll watch over your digital assets 24/7 so you can focus on what matters most.
